

## TLS Enhanced Cubicle 2 (EC2)

### Introduction:

Introducing the Enhanced Cubicle 2 (EC2) Washroom System, a premium solution designed for durability and style in dry environments. Crafted from 19-20mm Moisture-Resistant MDF board and faced with high-pressure laminate, the EC2 system offers a blend of strength and sophistication. Its robust construction is complemented by high-quality stainless-steel hardware, ensuring longevity and resilience even in high-traffic areas. Ideal for commercial settings, the EC2 washroom system is a hardwearing product that combines practicality with a sleek, modern aesthetic. Choose the EC2 for a reliable and visually appealing washroom solution.

### Applications:

The Enhanced Cubicle 2 (EC2) washroom system is designed to provide a versatile and durable solution for various washroom environments, particularly those that require a high level of hygiene and efficiency. The EC2 system is ideally suited for applications in dry environments, such as office buildings, schools, healthcare facilities, and retail spaces, where maintaining cleanliness and a professional appearance is critical. Its robust design and easy maintenance make it an excellent choice for areas with high foot fall.

## TLS Enhanced Cubicle 2 (EC2)

### Features:

The EC2 cubicle has many features including the following:

- Durable product suitable for dry environments
- Bolt through fixings & secretly fixed options available
- 2mm PVC lipped edges to all panels (option to postform).
- DDA Compliant turn lock with emergency release facility
- Pedestal legs adjustable to accommodate uneven floors
- Can be manufactured to suit various height requirements
- Manufactured only in High Pressure Laminate
- Available in over 100+ laminate colours

### Dimensions:

- Standard Height – 2100mm with 150mm floor clearance
- Floor to ceiling cubicles possible with 20mm foot or set in floor channel

### Fixtures & Fittings:

Enhanced Cubicle 2 (EC2) uses durable stainless-steel hardware, which provides long-lasting strength and resilience. Stainless steel is an ideal choice for environments where durability and resistance to corrosion are crucial, such as in high-traffic or high-moisture areas. The material's strength ensures that the cubicle can withstand daily wear and tear, while its resistance to rust and other forms of corrosion make it easy to maintain and clean. This hardware choice also contributes to a sleek, modern aesthetic, enhancing the overall appearance and functionality of the cubicle.

## TLS Enhanced Cubicle 2 (EC2)

### Material:

High-Pressure Laminate (HPL) is a durable, decorative surface material made by bonding multiple layers of paper under high heat and pressure. It is widely used in various applications, particularly in furniture, countertops, wall panels, and washroom cubicles due to its resilience and aesthetic versatility.

### Durability:

HPL is resistant to impact, scratches, moisture, and heat, making it ideal for high-traffic and demanding environments.

### Versatility:

It comes in a wide range of colours, patterns, and finishes, including wood grains, metallics, and solid colours.

### Maintenance:

It is easy to clean and maintain, as the non-porous surface resists stains and bacteria.

### Cost-Effectiveness:

HPL provides an affordable alternative to natural materials, offering a similar appearance with enhanced performance.

**Because of these properties, High-Pressure Laminate is a popular choice in various industries, especially in applications where both durability and aesthetics are important.**
