

TLS Elegance 13 Cubicle (EL13)

Introduction:

Introducing our Elegance 13 flush-fronted cubicle system, designed to offer both style and durability. Crafted from 13mm solid grade laminate (SGL), this cubicle system is built to withstand the toughest environments, making it ideal for both wet and dry settings.

The Elegance 13 features rebated doors and pilasters, ensuring a seamless and flush appearance that exudes sophistication. The rebated design not only enhances the sleek aesthetic but also provides additional privacy and security. Whether you need a solution for high-traffic areas or spaces prone to moisture, the Elegance 13 delivers exceptional performance and offers long-lasting performance backed by a 10-year laminate warranty. Combining both contemporary design with long-lasting resilience.

TLS Elegance 13 Cubicle (EL13)

Applications:

Due to the robust nature of the materials and high-quality fittings this ensures that Elegance 13 can withstand the demands of high-traffic areas, making it perfect for schools, gyms, leisure centres, cinemas, sports stadiums, healthcare facilities, and more. Backed by a 10-year laminate warranty, the Elegance 13 washroom system offers reliable performance and peace of mind for years to come.

Features:

The Elegance 13 cubicle has many features including the following:

- Versatile product suitable for wet and dry environments
- Secretly fixed fittings
- Machined and polished edges to all panels
- Rebated edges to both doors and pilasters
- DDA Compliant turn lock with emergency release facility
- Can be manufactured to suit various height requirements
- Manufactured only in Solid Grade Laminate
- Available in over 100+ laminate colours
- 10 Year Warranty (Laminate Panels).

Dimensions:

- Standard Height – 2100mm with 20mm floor clearance
- Full height cubicles possible with 20mm foot or partitions set in floor channel
- DfE compatible option available with 5mm gap to underside of door and pilaster

Fixtures & Fittings:

Elegance 13 (E13) uses durable stainless-steel hardware, which provides long-lasting strength and resilience. Stainless steel is an ideal choice for environments where durability and resistance to corrosion are crucial, such as in high-traffic or high-moisture areas. The material's strength ensures that the cubicle can withstand daily wear and tear, while its resistance to rust and other forms of corrosion make it easy to maintain and clean. This hardware choice also contributes to a sleek, modern aesthetic, enhancing the overall appearance and functionality of the cubicle.

TLS Elegance 13 Cubicle (EL13)

Material:

Solid Grade Laminate (SGL) is a high-performance material widely used in environments requiring durability, hygiene, and resistance to moisture and impact. It's made by compressing multiple layers of kraft paper impregnated with phenolic resin and topped with a decorative surface layer, which is treated with melamine resin for additional strength and protection.

Durability:

SGL is highly durable, capable of withstanding significant impact, abrasion, and heavy use, making it ideal for high-traffic areas like schools, hospitals, and commercial kitchens.

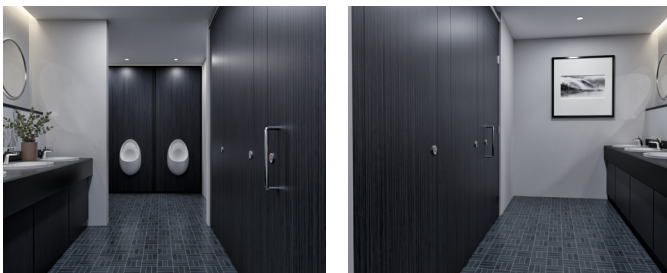

Moisture Resistance:

The phenolic resin core and melamine surface layer give SGL excellent resistance to moisture, making it suitable for wet environments such as bathrooms, shower cubicles, and laboratory worktops.

Hygiene:

The non-porous surface of SGL prevents the growth of bacteria and fungi, making it a preferred material in areas where hygiene is crucial.

In summary, Solid Grade Laminate is a durable, moisture-resistant, and versatile material, ideal for demanding environments that require both strength and aesthetic flexibility. Its solid construction and high resistance to wear and chemicals make it a preferred choice for many commercial and institutional applications.
