

TLS Elegance 44 Cubicle (EL44)

Introduction:

Introducing the Elegance 44 – our flagship premium cubicle solution designed for those who demand the very best in style and durability. With flush-fronted and hardwood-edged 44mm thick doors and pilasters, alongside 30mm thick partitions, this range offers a robust yet sophisticated aesthetic that stands out in any high-end commercial environment.

The Elegance 44 can be crafted in both High-Pressure Laminate and Real Wood Veneer finishes, providing versatility in design while maintaining exceptional quality. Equipped with Royde & Tucker hinges, a secure mortice lock, and soft-close dampeners, every detail has been meticulously engineered for both function and form. The invisible fixings that join the partitions and pilasters ensure a seamless, premium finish that rivals the most luxurious options available on the market. Choose Elegance 44 for a truly elevated space.

TLS Elegance 44 Cubicle (EL44)

Applications:

The Elegance 44 Cubicle washroom system is designed to provide a versatile and durable solution for various washroom environments, particularly those that require a high level of hygiene and efficiency. The Elegance 44 system is ideally suited for applications in dry environments, such as office buildings, schools, healthcare facilities, and retail spaces, where maintaining cleanliness and a professional appearance is critical. Its robust design and easy maintenance make it an excellent choice for areas with high foot fall.

Features:

The Elegance 44 cubicle has many features including the following:

- Durable product suitable for dry environments
- 44mm doors & pilasters with hardwood rebated edges
- 30mm thick partitions
- Premium Royde & Tucker hinges, mortice lock and dampeners for soft close
- Invisible fixings to connect both pilasters and partitions for minimalist appearance
- DDA Compliant turn lock with emergency release facility
- Can be manufactured to suit various height requirements
- Manufactured in High Pressure Laminate & Real Wood Veneer

Dimensions:

- Floor to ceiling cubicles

Fixtures & Fittings:

Elegance 44 Cubicle uses durable stainless-steel hardware, which provides long-lasting strength and resilience. Stainless steel is an ideal choice for environments where durability and resistance to corrosion are crucial, such as in high-traffic or high-moisture areas. The material's strength ensures that the cubicle can withstand daily wear and tear, while its resistance to rust and other forms of corrosion make it easy to maintain and clean. This hardware choice also contributes to a sleek, modern aesthetic, enhancing the overall appearance and functionality of the cubicle.

TLS Elegance 44 Cubicle (EL44)

Material (Veneer):

Real wood veneer is a thin layer of natural wood that is applied to our Elegance 44 cubicle system to give the appearance of solid wood without the associated cost or weight, the real wood veneer provides several key benefits:

Natural Aesthetic:

Since it's made from actual wood, the veneer offers the same rich, natural patterns and textures you'd find in solid wood, making the cubicle visually appealing.

Eco-Friendly Option:

Veneering uses less wood than solid wood construction, which makes it an eco-friendlier option. It allows you to enjoy the beauty of wood while using fewer resources.

Cost-Effective:

Real wood veneer provides the elegance of solid wood at a lower cost, offering a balance between luxury and affordability.

Durability:

When applied to a stable substrate, the veneer adds strength and durability to the structure, resisting warping and cracking better than solid wood in some cases. With proper care, wood veneer surfaces can last a long time and maintain their beauty.

Overall, the use of real wood veneer on the Elegance 44 cubicle enhances its appearance with a natural, high-quality finish while also being practical in terms of cost and durability.

TLS Elegance 44 Cubicle (EL44)

Material (High Pressure Laminate):

High-Pressure Laminate (HPL) is a durable, decorative surface material made by bonding multiple layers of paper under high heat and pressure. It is widely used in various applications, particularly in furniture, countertops, wall panels, and washroom cubicles due to its resilience and aesthetic versatility.

Durability:

HPL is resistant to impact, scratches, moisture, and heat, making it ideal for high-traffic and demanding environments.

Versatility:

It comes in a wide range of colours, patterns, and finishes, including wood grains, metallics, and solid colours.

Maintenance:

It is easy to clean and maintain, as the non-porous surface resists stains and bacteria.

Cost-Effectiveness:

HPL provides an affordable alternative to natural materials, offering a similar appearance with enhanced performance.

Because of these properties, High-Pressure Laminate is a popular choice in various industries, especially in applications where both durability and aesthetics are important.
