

## Case Study: Alpha Way

### PROJECT OVERVIEW

**Project Name:** Alpha Way

**Location:** Thorpe Industrial Estate, Egham

**Contractor:** Woodvalley Builders Limited

**Sector:** Commercial / Industrial

### The Brief

The Alpha Way development required a robust, clean, and hard-wearing washroom solution suitable for a modern commercial / industrial environment. Durability and ease of maintenance were key drivers, alongside delivering a refined, flush-fronted aesthetic consistent with a contemporary workspace. The client also required integrated storage and practical access solutions to support ongoing maintenance.

### Our Solution

Total Laminate Systems supplied and installed a complete washroom package centred around our Elegance 13 flush-fronted cubicle system in Solid Grade Laminate (SGL). The specification was complemented by coordinated SGL vanity units, IPS panels with secure access, lockers, and mirrors to deliver a fully integrated solution. The flush-fronted design created a seamless, modern appearance while maintaining the strength and longevity expected in a commercial setting.

## Case Study: Alpha Way

### Manufacture & Installation

All elements were supplied and installed by Total Laminate Systems, ensuring quality control from production through to completion. The use of Solid Grade Laminate throughout delivered a consistent, resilient solution aligned with the operational needs of a busy commercial environment.

### Outcome

The completed washrooms at Alpha Way provide a durable, low-maintenance, and visually cohesive solution for a modern commercial development. The combination of flush-fronted cubicles, integrated storage, and robust materials ensures long-term performance within a high-use environment.
