

Case Study: Gym Tunbridge Wells

PROJECT OVERVIEW

Project Name: Gym Tunbridge Wells

Location: Tunbridge Wells, Kent

Contractor: Kingfisher Construction Services Ltd

Sector: Leisure & Fitness

The Brief

The Gym Tunbridge Wells project required a durable and hygienic washroom solution suitable for a 24/7 fitness environment. With high footfall, continuous use, and regular turnover of members, the facilities needed to perform reliably across both toilet and shower areas. The specification called for robust materials capable of withstanding moisture, impact, and intensive daily cleaning within an active live site.

Our Solution

Total Laminate Systems supplied and installed a coordinated washroom package built around our EC3 cubicle system in Solid Grade Laminate (SGL). The system was selected for its durability and suitability for high-volume leisure settings. The cubicles were complemented by Solid Grade Laminate shower areas and solid surface trough washstations, providing clean, seamless surfaces designed to endure constant use.

Manufacture & Installation

Total Laminate Systems supplied and installed all washroom elements, coordinating works within a live and active project environment. The use of Solid Grade Laminate throughout ensured a consistent and resilient solution capable of withstanding the demands of a busy gym setting.

Outcome

The completed washrooms at Gym Tunbridge Wells deliver a robust, hygienic, and long-lasting solution tailored to the needs of a high-use 24/7 fitness facility. The combination of EC3 cubicles and solid surface troughs ensures durability while maintaining a clean, professional finish.
