

Case Study: High View Primary School

PROJECT OVERVIEW

Project Name: High View Primary School

Location: Surrey

Contractor: Woodland Commercial Ltd

Sector: Education

The Brief

High View Primary School required a robust, hygienic, and low-maintenance washroom solution suitable for a busy primary school environment. The specification needed to accommodate daily high usage, support easy cleaning, and provide long-term durability while remaining appropriate for use by young pupils.

Our Solution

Total Laminate Systems supplied and installed a complete washroom package tailored for the education sector. The specification centred around EC3 cubicles and Solid Grade Laminate components, selected for their strength, impact resistance, and hygiene benefits within a school setting.

Manufacture & Installation

All washroom elements were supplied and installed by Total Laminate Systems, ensuring consistency of quality from manufacture through to completion. The use of Solid Grade Laminate throughout provided a durable solution aligned with the operational needs of a modern school.

Outcome

The completed washrooms at High View Primary School deliver a clean, robust, and long-lasting solution that meets the demands of a busy educational environment. The chosen materials and layout provide a practical, low-maintenance facility designed to perform reliably throughout the life of the building.
