

## Case Study: Hopescourt SEN School

### PROJECT OVERVIEW

**Project Name:** Hopescourt SEN School

**Location:** Walton upon Thames, Surrey

**Contractor:** Willmott Dixon Construction

**Sector:** Education – SEN

### The Brief

Hopescourt School is a newly delivered specialist free school providing high-quality education for autistic children and those with communication and interaction needs, supporting students from Reception through to Post-16. The washroom facilities required a solution that was robust, safe, hygienic, and supportive of a specialist educational environment. Durability, privacy, and ease of maintenance were key drivers, alongside materials capable of withstanding daily use within an SEN setting.

### Our Solution

Total Laminate Systems supplied and installed a complete washroom package centred around our Shock full height cubicle system in Solid Grade Laminate (SGL). The full height design was selected to enhance user privacy while maintaining strength and stability. The cubicles were complemented by Solid Grade Laminate base units, solid surface trough vanity units, and SGL IPS panels, creating a consistent and highly durable washroom solution tailored for specialist education.

## Case Study: Hopescourt SEN School

### Manufacture & Installation

All washroom elements were supplied and installed by Total Laminate Systems, ensuring full quality control from manufacture through to completion. Careful coordination with the main contractor ensured the installation aligned seamlessly with the wider programme for this new specialist facility.

### Outcome

The completed washrooms at Hopescourt SEN School deliver a robust, safe, and highly durable solution designed to support the needs of a modern specialist learning environment. The combination of full height cubicles and hard-wearing materials ensures long-term performance while maintaining a clean and considered aesthetic.
