

Case Study: Ipeco, Southend

PROJECT OVERVIEW

Project Name: Ipeco, Southend

Location: Southend-on-Sea, Essex

Client: Ipeco

Contractor: Prince Build

Sector: Industrial & Manufacturing

The Brief

The brief for the Ipeco Southend facility focused on delivering a robust, hygienic, and highly functional washroom solution for staff areas. The client required materials capable of withstanding daily use in a demanding working environment, while maintaining a clean, modern appearance and incorporating a bright colour scheme to enhance the internal spaces. Privacy and durability were key considerations, particularly within staff washrooms.

Our Solution

Total Laminate Systems supplied and installed a complete washroom package incorporating full height EC3 cubicles, Solid Grade Laminate IPS panels, and Corian trough washstations. The specification was selected to balance durability, ease of cleaning, and visual impact, providing a practical yet high-quality solution suited to an industrial environment.

Manufacture & Installation

All elements were supplied and installed by Total Laminate Systems' direct delivery and installation teams, ensuring consistent quality across the project. Coordination with the contractor allowed the works to be delivered efficiently within the wider programme for the facility.

Outcome

The completed washrooms at Ipeco Southend provide a durable, hygienic, and visually engaging solution for staff use. The combination of full height cubicles, hard-wearing materials, and integrated washstations delivers a practical long-term solution aligned with the operational demands of a modern manufacturing environment.
