

Case Study: Sandown Racecourse

PROJECT OVERVIEW

Project Name: Sandown Racecourse

Location: Esher, Surrey

Contractor: Fitzgerald Building Services Ltd

Sector: Leisure & Hospitality

The Brief

Sandown Racecourse required washroom solutions capable of withstanding very high footfall during race days and events. The brief called for products that were exceptionally hard-wearing, easy to clean, and suitable for a demanding public environment without compromising on appearance or longevity.

Our Solution

Total Laminate Systems worked closely with the contractor to specify a robust, long-term solution using Solid Grade Laminate (SGL) throughout. Our EC3 cubicle system, SGL IPS panels, and SGL vanity units were selected to deliver maximum durability, hygiene, and performance in a high-traffic setting.

Manufacture & Installation

All products were manufactured in-house at our Bournemouth factory, allowing full control over quality, lead times, and consistency. The washroom solutions were produced using Fundermax Solid Grade Laminate, renowned for its durability, colour stability, and performance in demanding environments.

Outcome

The completed washrooms at Sandown Racecourse deliver a robust, practical, and long-lasting solution that meets the challenges of a busy leisure venue. The combination of high-quality materials and in-house manufacturing ensures a finish designed to perform for years with minimal maintenance.
